EXPERIENCE

Software Developer (Promoted from Intern)

Feb 2026 – Present

Inspire Holdings Incorporated – *Taguig City, Philippines*

- **Rapid Career Progression:** Transitioned from a Software Developer Intern to a full-time role within 3 months, quickly adapting from a C# / ASP.NET Core background to a modern TypeScript backend stack.
- **Backend Architecture:** Designed and developed modular backend features using **TypeScript, NestJS, Prisma ORM, and Supabase** to support complex system workflows and database-driven logic (DTOs, services, controllers).
- **Real-Time Features:** Supported and optimized real-time communication infrastructure utilizing **Redis and Socket.IO**, improving backend flow control and implementing lightweight ticket-based access validation.
- **System Maintainability:** Enhanced database scalability and team collaboration by restructuring Prisma schemas and executing clean migration practices.
- **Debugging & Optimization:** Analyzed system behavior, isolated complex meeting logic, and debugged critical backend issues to improve client-facing applications.

PROJECT WORK

GAS (Guided-Adaptive Smoothing) Forecasting System – Thesis

2024 -2025

Thesis Project | C# Backend

Designed and implemented a hybrid forecasting system combining SES and Holt-Winters using a moving window approach. Manually implemented forecasting logic in C# to deeply understand model assumptions and behavior. Computed multiple error metrics per window to adaptively select the best-performing model. Structured forecasting logic into backend services for clarity, maintainability, and correctness. Focused on performance and explainability of forecasting results.

RELEVANT STRENGTHS

- **Backend-Focused:** Strong foundation in API design, database optimization, and service-layer workflows with real-world production experience.
- **Adaptable & Fast Learner:** Proven ability to quickly pick up company-specific tools, complex architectures, and modern frameworks under tight deadlines.
- **Systems Thinking:** Strong interest and technical capability in backend systems, internal tools, real-time features, and high-performance applications.
- **Communication:** Able to effectively communicate, document technical workflows, and collaborate in English within cross-functional team environments.

EDUCATION

Bachelor of Science in Computer Science - Cum Laude

2022 - 2026

Major in Data Mining

Isabela State University Main Campus
